

Política de Compras Sostenibles del Hotel Parque Tropical

Commitment

The Hotel is committed to integrating environmental, social and economic criteria into its purchasing decisions whenever this is technically, operationally and economically feasible. The objective is to reduce the negative impacts associated with the products and services purchased while promoting options that generate benefits for the environment, the local economy and the community.

When selecting products, services and suppliers, the Hotel will take into account, whenever possible, the following criteria:

1. Circular Economy and Waste Management

Whenever possible, preference will be given to products that:

- Are manufactured using recycled materials.
- Are reusable, repairable or easily recyclable at the end of their useful life.
- Can be reused or given a second life within the Hotel or through partner organisations.
- Minimise waste generation.
- Reduce the use of disposable items and single-use plastics.
- Are supplied with minimal packaging or with reusable, recyclable or compostable packaging.

2. Origin and Supply Chain

Whenever possible, preference will be given to products and services that:

- Are produced or sourced sustainably.
- Are manufactured or produced locally.
- Are supplied by locally owned businesses.
- Are provided by small and medium-sized enterprises (SMEs).
- Are sourced from Fairtrade suppliers where such options are available.
- Contribute to the economic development of the local community.

3. Certifications and Good Practices

Where equivalent alternatives exist, preference will be given to products and services that hold recognised sustainability certifications or can demonstrate good environmental and social practices.

Examples of recognised certifications include:

- FSC® or PEFC™.
- MSC or ASC.
- Rainforest Alliance.
- Fairtrade.
- EU Ecolabel.
- Organic Agriculture certification or other equivalent certification schemes.

4. Resource Efficiency

Priority will be given to products and equipment that:

- Consume less energy.
- Consume less water.
- Have a longer service life.
- Are durable, repairable and easy to maintain.
- Generate fewer emissions or less pollution during use.
- Reduce the need for printing or paper consumption.

5. Transport and Logistics

Whenever possible, preference will be given to options that:

- Reduce the number of deliveries.
- Allow orders to be consolidated.
- Use lower-emission transport methods.
- Minimise transport distances.
- Optimise logistics in order to reduce the environmental footprint.

6. Food and Beverage Purchasing

When purchasing food and beverages, particular consideration will be given to:

- Local and seasonal products whenever available.

- Sustainable production methods.
- Animal welfare.
- Recognised sustainability certifications.
- Reducing food waste through appropriate product formats and purchasing quantities.
- Purchasing products in bulk or in returnable or refillable packaging whenever feasible.

7. Local Heritage

Whenever possible, the Hotel will prioritise the purchase of products, services and experiences that reflect the destination's natural environment, history, culture and traditions, thereby contributing to the economic and cultural development of the local community.

8. Staff Responsibilities

Employees responsible for purchasing shall consider the sustainability criteria established in this policy throughout the procurement and supplier selection process.

Whenever feasible, preference shall be given to products and services that meet one or more of these criteria.

Where significant differences exist in cost, availability or technical requirements, alternative options may be selected. Where appropriate, the reasons for such decisions shall be documented.

9. Monitoring and Continuous Improvement

To demonstrate the implementation of this policy, the Hotel will:

- Ensure that employees responsible for purchasing are informed of these sustainability criteria.
- Integrate sustainability criteria into purchasing procedures and supplier evaluation processes.
- Keep records of examples of products and services purchased that meet one or more of these criteria.
- Periodically review this policy to identify opportunities for improvement and to ensure it remains aligned with market developments and the Hotel's operational needs.
